

Mitchell Avery

SENIOR 3D ARTIST | TECHNICAL ARTIST

Denver, CO | 303.928.9447 | mitchellavery@comcast.net

Technical Artist and Visualization Specialist with 15+ years of experience creating production-ready 3D assets, real-time visualizations, animations, and presentation content. Experienced in Unreal Engine, Maya, 3ds Max, Adobe Creative Suite, and workflow automation. Proven ability to develop scalable pipelines, optimize asset production workflows, build reusable asset libraries, and bridge communication between artists, designers, and technical stakeholders. Currently completing a B.S. in Computer Science with additional focus on graphics programming, automation, and real-time rendering technologies.

Experience

Ryan Companies | Senior 3D Artist

2021 - Present

- Create high-fidelity 3D visualizations, animations and presentation assets supporting design reviews and executive stakeholder communication.
- Collaborate with remote teams to enhance project pipelines and optimize asset production.
- Research, evaluate, and implement emerging technologies including Unreal Engine, procedural workflows, AI-assisted content generation, motion tracking, and visual effects systems.
- Build reusable asset libraries and standardized production techniques to improve consistency, scalability, and team efficiency.
- Collaborate with designers, artists, and technical stakeholders to deliver production-ready visual content under tight deadlines.
- Optimize rendering, lighting, and post-production pipelines resulting in improved throughput and visual quality.

Homeshow.io | Lead Production Artist, VR Developer

2016 - 2019

- Developed interactive real-time experiences using Unreal Engine and VR technologies.
- Created and maintained a comprehensive library of reusable, game-ready 3D assets supporting multiple visualization and VR projects.
- Produced visual storytelling content including animations, presentations, and immersive environments.

VizGraphics | 3D Artist

2018 - 2021

- Introduced and integrated Unreal Engine, 3ds Max, and real-time visualization workflows into production pipelines.
- Produced interactive visualization experiences, animations, and presentation-ready content for client-facing deliverables.
- Collaborated across disciplines to improve rendering quality, workflow efficiency, and project delivery timelines.

Education

University of Colorado, Boulder BS Computer Science	2026
Accademia Nemo, Firenze, Toscana Certification in 3D Modeling and Animation	2015
Florence Design Academy, Firenze, Toscana Certification in Industrial and Graphic Design	2014
University of Colorado, Boulder BFA Film Minor Italian	2007

Skills & abilities

- **3D Content Creation:** 3ds Max (20+ years), Maya, Zbrush, Substance, TyFlow, Houdini
- **Rendering and Lighting:** V-Ray, Corona, Redshiftsd
- **Real-Time & Visualization:** Unreal Engine, VR, Chaos Vantage
- **Compositing & Postproduction:** After Effects, Photoshop, Davinci Resolve, Fusion, Syntheyes
- **Programming:** Maxscript, Python, C++, OpenGL
- **AI Tools:** Stable Diffusion, ComfyUI
- Workflow Optimization / Automation
- Cross-Team Collaboration
- Asset Management
- Animation
- Pipeline Development
- Technical Documentation
- Emerging AI Workflows

Technical Highlights

- Introduced Unreal Engine workflows into production visualization pipelines.
- Developed MAXScript and Python tools to automate repetitive production tasks.
- Built and maintained reusable asset libraries for visualization projects.
- Researched and implemented AI-assisted content creation workflows.
- Developed procedural modeling and effects/simulation workflows using Railclone, Tyflow and Houdini.
